

HOW CLEAN IS YOUR CLEAN FACILITY?

Meeting the standards of a clean room can be a daily if not hourly challenge. Depending on the industry, any number of governing entities can be involved in setting the latest standards. And passing **U.S. Food and Drug Administration (FDA)** and/or **U.S. Department of Agriculture (USDA)** inspection is critical on many levels.

Clean rooms or environments need to be conducive for effective wash-down. Simple design and construction plus durable materials are product requirements in order to withstand high-pressure cleaning and harsh chemicals. In the **food manufacturing and processing** industry clean requirements are stringent and products must rise to the challenge.

Rite-Hite has full lines of products specifically designed to cut down or nearly eliminate particles/fibers, chemicals, bacteria, and more as well as manage humidity when required. Our products are FDA and **cGMP** compliant with smooth curtain fabric and stainless steel components for easy wipe down and corrosion resistance. Add in simplicity of design, ease of operation and the potential for increased productivity and safety, Rite-Hite doors and industrial curtain walls by Zoneworks are an effective solution in any clean environment or business.

FasTrax Clean Door

- Withstands high pressure washdown with the harshest cleaning chemicals
- One piece radical header that is machined from a solid block of UHMW plastic
- Noncorrosive Lexan and UHMW side frames are lightweight and easily removable for deep cleaning
- Polypropylene fabric provides higher resistance to acids and bases, lower water absorption rates and higher resistance to mold
